

I would like to express that i am against BPL . I agree with the research done to date that this is going to cause mass interference problems . the problem in rural areas where there has been little or no maintance for years on the high lines will have a greater number of problems then in the citys. BUT there will be interference to all HF bands and i feel that the power companies do not have the manpower or knowhow to handle the problems in a fast and effence manner . thank you A. W.
